

MAANAS GOPI

Raritan, NJ

908-636-0164 | gopimaanas@gmail.com | [linkedin.com/in/maanas-gopi](https://www.linkedin.com/in/maanas-gopi) | maanasgopi.com | US Citizen

EDUCATION

University of Maryland

B.S. in Computer Science, Minor in Economics & Philosophy

College Park, MD

Expected Graduation: May 2027

- **Relevant Coursework:** Algorithms, Machine Learning, Compilers, Distributed Systems, Operating Systems, Databases
- **Certifications:** Microsoft Azure Fundamentals (AZ-900)

EXPERIENCE

Software Engineering Intern

Enfusion

June 2025 – Aug. 2025

New York City, NY

- Built a **multithreaded Java/Spring Boot portfolio simulation engine** processing **150+ FIX TCP messages/sec** (75% throughput increase) on AWS, supporting high-volume trading workflows for **850+ fintech enterprise clients**.
- Built a **CI/CD regression testing system** (Python, Jenkins, SQL) cutting test feedback from **7 hours to near real-time**, accelerating release velocity across QA and engineering.
- Diagnosed and resolved distributed system failures in collaboration with QA and Product, improving **fault tolerance and production stability**.

Software Engineering Intern

Sports Media Inc.

Aug. 2024 – Nov. 2024

Severance, CO

- Developed **Python/FastAPI microservices** powering an internal advertising client management platform for marketing and sales teams, serving **500+ clients** via **Kubernetes/Docker** cloud-native deployment.
- Engineered event-driven **Node.js/Python pipelines** integrating Twilio APIs and OpenAPI contracts for voice tracking, with fault monitoring and automated test coverage.
- Built **React/TypeScript** dashboard features in cross-functional collaboration with AI and product teams, applying component-driven design patterns to accelerate iteration.

Software Engineering Instructor & Operations Lead

iCode

Feb 2022 – Sep 2024

Bridgewater, NJ

- Built **automated grading systems and internal tooling** enforcing TDD and quality assurance standards, deployed across a **75+ franchise national network**.
- Designed and maintained standardized engineering curriculum (**Java, Python, SQL, C#**) covering OOP, data structures, and software design principles.
- Instructed **200+ students** in full-stack development and system design over 2.5 years.

Software Engineering Intern

eMedEvents

June 2021 – Aug. 2021

Somerville, NJ

- Shipped **20+ production UI components** (HTML/CSS/JavaScript, XML) delivering a **25% performance improvement**.
- Redesigned core UI/UX flows via **Figma** and usability testing, improving navigation for **150K+ monthly active users**.

PROJECTS

YouTube Automation Pipeline | Node.js, TypeScript, OAuth2, Cheerio

June 2025 – Present

- Built a **Node-based automation workflow** extracting metadata, generating assets, and publishing to YouTube via OAuth2 to enable fully autonomous content delivery.
- Adopted by professional music producers to generate **7M+ collective views**, built on scalable cloud-connected architecture.

1Mains Audio Platform (Founder) | Python, PyTorch, Distributed Systems

Jan. 2025 – Present

- Founded and shipped an **AI-powered sound design tool** for music producers that takes audio samples and natural language descriptors to generate transformed sounds via **DSP and diffusion modeling (PyTorch)**.
- Delivered a **revenue-generating platform** with **2,000+ active users**, serving a brand with 5M+ cumulative streams.

Employee Registry Cloud System | Go, AWS, Docker, Kubernetes, MySQL

May 2024 – Sep. 2024

- Developed a **containerized Go microservice backend** on AWS using Kubernetes for horizontal scalability, automated rollback, and fault-tolerant production operation.
- Integrated **AWS services (Lambda, CloudWatch, Route53)** with persistent MySQL, enabling full observability, logging, and reliable distributed system operations.

TECHNICAL SKILLS

Languages: Java, Python, Go, C/C++, JavaScript/TypeScript, SQL

Frameworks & Libraries: Spring Boot, FastAPI, React, Node.js, Docker, Kubernetes, Jenkins, PyTorch, HuggingFace, NumPy, Pandas

Cloud & Infrastructure: AWS (Lambda, CloudWatch, EC2, SQS, SNS), Azure, CI/CD Pipelines, Microservices, Distributed Systems

Practices: Agile, Test-Driven Development (TDD), Automated Testing, Scalable System Design, Software Design Patterns
